The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27-39,41-43,45,47-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Bowman et al. 5584566. Bowman teaches a display panel having mutually opposing first and second edges comprising male and female connections.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 40, 44, 46 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowman et al. '566 in view of Funk et al. 6536147. Bowman et al. '566 teach the device absent the conduit for electrical wiring. Funk et al. teach a display panel system with a conduit for electrical wiring. To provide Bowman et al. with a conduit for electrical wiring as taught by Funk et al. for the purpose of using electrically powered components with the display would have been obvious for one having ordinary skill in the art at the time of the invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar display panels are illustrated by Adderton 6546675; Auer et al. 2001/0025460; Rhodes 2003/0205544; Jonker 4867320; Cairnes 4094417 and Firks 3889736.
